If you've been careful of wireless vacuum cleaners in the past because of poor suction power and battery life, listen: wireless vacuum cleaners today have come a long, long way. They are more powerful, more comfortable, and work longer than ever before, stacking very well against their wired, clumsy upright and canister counterparts. And who can argue with the convenience the wireless vacuum brings in the icy cleaning challenge? No connecting and disconnecting (and connecting and disconnecting again) as you clean different rooms. And don't try to chase down animal hair or dust rabbits lurking in the most difficult places of your home. They are also easier to store away in the underground-perfect for a smaller life. Our favorite stick models are also just fun (yes, really) to use. They are sleek, lightweight, and come with useful attachments and tools. Some even turn into portable vacuums with the click of a mouse. They are enough to make cleaning a chore to look forward to or at least make it less horrible. Here are our best picks for the best wireless vacuum cleaners. At just under six pounds, Cyclone V10 Absolute will make all your cleaning dreams come true. That is, if your dreams include being able to clean carpets, wooden floors, blinds, ceiling fans, and hard to reach the slits with absolute ease. Its strength can also rival any of its upright or canister counterparts. The V10's torque driver's cleaner head Dyson is the most powerful yet, driving dirt from carpets like this NBD. But it's also gentle on hard floors as it's engineered with soft woven nylon and anti-static carbon fiber. It works up an impressive 60 minutes on the bottom setting, so you can easily do a complete cleanup without the need for recharging. Does the car need a good cleaning? Cyclone V10 is also turning into a portable one. Cleaning the bin is also a breeze. Its point-and-shoot allows you to hygienically throw dust and debris deep into the bin, in one action - you don't need to touch the dirt. Amazon reviewer Matthew Mintun writes: V10 Absolute will not disappoint. While it's weird to get used to carrying this tiny piece of technique, it really does an amazing job. I vacuumed with my Dyson floor vacuum and then with the V10, it was incredible how much dog fur it still took! I was pretty collected to be honest, think I lived in this atmosphere for this long thinking it was pure nuts! I love all the attachments too, they are all top-notch and well made. I feel like I can handle my whole house with this bad boy. And it's light! I use it at the lowest set-up, and it still picks up a ton (and to be clear when I made my old vs. new test, the V10 was on the lowest set-up tool) I don't think I'll ever need a high or average setup. But I did try the most the situation for a few seconds and literally felt that the vacuum was BEFORE to the floor, that's how hard it sucked (in a good way)! Pets: They are fun, loyal, and oh-so-furry, which means you need to tackle cleaning the hair of pets on a regular basis. Don't worry. Once again, Dyson comes to the rescue with a V7 Animal wireless vacuum cleaner that is designed specifically for homes with pets. Its powerful engine makes quick work of hair, dust and pet dander, both on carpets and hard floors. And you can get rid of it just as quickly, thanks to the built-in release of dirt. But we also love all the tools and attachments that come with super-smooth devices. The combined tool makes it easier to switch between surfaces; The slit tool helps with accurate cleaning around the edges and narrow gaps (because we all know pesky pet hair can hide in the most complex spots); and the soft dust brush is gentle on gentle surfaces like screens. Best of all it's just so easy to use. Amazon desert reviewer Dave writes: I really couldn't believe the reviews I read about this vacuum. But, now that I have one, I believe everything they say about it. It's so easy to use. It's lightweight.... I have had it for about a month now and use it every day! It makes great on the carpet and bare floor without having to make any adjustments or change any head tool. High suction setting will pick up small stones and sand without problems. The low suction setting is perfect for carpets and gets them really clean without picking them up, something high suction settings will do if you're not very careful using it. I've used all the attachments and they are very convenient. The fact that it turns into a hand vacuum makes it ideal for vacuuming the car and soft furniture... My wife has been angry with me for years no more actively about vacuuming the house... But, now, I vacuum the whole house every day and enjoy doing it. Filling that canister with cat hair and dust is very satisfying. A vacuum cleaner can be a big investment, so choosing a versatile machine that can work on different surfaces is key. Enter, Bissell AirRam 1984. This workhorse from Bissell effectively treats all the usual tasks of vacuuming on multiple flooring surfaces, including carpets, area rugs, and hard floors. It has an innovative power foot design and multicolor roll brushes that provide excellent carpet cleaning and without scratching the hard floor cleaning. Another major shake-up of this wireless vacuum is its maneuverability. Need to reach under and around the furniture? No problem. The airram's rotary steering and flat handle make it easy. And you can also unleash your inner clean freak with its bright, wide LED lights that illuminate the hard floors so you can see the dirt and get all the dirt. The dust of rabbits lurking under the bed is not under the match for this cleaning beast. Amazon reviewer M.L. Asselin writes: Bissell 1984 Air Ram Cordless Vacuum is a comfortable, effective vacuum stick that makes great picking up animal hair and dirt from both carpeted and hard surfaces. The mud bin collection picks up without any problems and is designed for ease of use: the slider pushes the hair and dirt straight. Lithium-ion lithium-ion Holds his charge superbly; if used lightly, the charge will be held for several weeks. Bright LED light illuminates your path. The rotating vacuum head and handle can be lowered, but not quite flat making it easier to get to hard-to-reach places. Because of the lightweight Air Ram Cordless Vacuum, I'm even able to use it on the carpet stairs effectively. Lightweight, fast to build and store, and easy to clean, this vacuum is fast becoming a commonly used tool in our family. I'm not yet ready to give up my heavier vacuum cleaner, but the Air Ram Cordless vacuum will probably be my go-to device. Weighing in at less than five pounds, you will find yourself easily zipping around the left, right, center, and anywhere in between with this easy cleaning machine. Need to reach high in the crevice in the ceiling? Deik 2-in-1 makes it easy to get these debris and cobwebs on the fan ceiling without having to give yourself a workout hand. The removable arm vacuum is also great for cleaning small dining rooms in and around cramped spaces. It may not have the signature recognition of Dyson or Bissell, but this workhorse provides deep, thoroughly clean and impressive multicolored features. You can quickly move from hard flooring to a rug area and low carpet heap at the touch of a button. It's the convenience that makes cleaning the heck a lot more enjoyable. Many reviewers were pleasantly surprised at how Deik 2-in-1 stacked against big-name brands. Amazon reviewer James writes: This is the best vacuum I've ever owned, and I owned several different brands. I borrowed my friend's Dyson before I bought this... It works amazingly both on hardwood and on the carpet (which is surprisingly difficult to find in a vacuum). The canister is super easy to empty and see when full. I have a bit of OCD when it comes to cleaning so a good vacuum should have for me. I have zero complaints and I just love it! Amazon reviewer TW was skeptical at first, but was won. They write: I use this mainly on hardwood, tiles and vinyl, and one room carpet. Three weeks of using this daily here is what I found. Battery life is good enough for 650 square feet of hard surface. The refill time is 4 hours. It is very light weight and extremely maneuverable. This low profile is enough to go under most furniture. The suction power is really good. It will actually pull the free floating vinyl in our bathroom to the point of a harder vacuum due to suction. I have two Samoyed dogs that are constantly shed and this lifts their fur very well from hard surfaces, square carpets, and carpet on one aisle. It disassembles easily and easily clean filters... I liked this vacuum cleaner so much that I bought a second one for a lower level, believing that I can't lose on the price, given that the competition is as much as 4X. you don't have to pay more than \$100 for a wireless vacuum that can bust some some Dust. Case in point: This affordable Dirt Devil Reach Max 3-in-1 stick vac can power through the messes in your home with powerful suction and easy maneuverability. What do we like about this little guy? What about its versatility? Dirt Devil Reach Max is easy to control under and around furniture and other obstacles for careful cleaning. It is also quickly converted into a wireless hand vacuum for stairs, upholstery and cleaning of the car. The included slit tool is attached to address tight spaces and is difficult to get to the place. While it doesn't have the longest running time (it runs up to 20 minutes with one charge) and may not work best for big messes, the premium brush roll on this little guy works great for fast clean-ups on both carpets and hardwood floors. Amazon customer Kevin Curtis says: Fantastic wireless vacuum is priced. This device works great. Holds the charge for at least 15-20 minutes at high speed (it has a medium and high-speed switch). It's light enough to hang on the hook. It is easy to attach the crevice cleaner or the stairs are sweeping. A well-designed one button hatch to clean the collection canister. Much better than disconnecting it all and having some things inevitably leak or spill like many other wireless or wired vacuums. It's not a type of Electrolux high power vacuum, high capacity vacuum, but it does an excellent job for quick touch, gets to hard to reach spots and leads to cleaner homes because we use it more often. No dragging heavy vacuum cleaners and comes from the fork to connect with them. I suggest adding LEDs to the motorized brush head as a modest improvement, but that's it. Well done Dirt Devil Team. Amazon reviewer Juanita Sorenson writes: I love this vacuum. It's half the Price of Dyson and has a lot of energy. I put it in the engine house where he has to pick up stickers, little stones, dog hair, dry grass, dirt... You get the picture. With 2 speeds it has enough energy to pick up all that up. It has 2 attachments, except for the powered main head. He doesn't have a hanger, but I just keep it in the closet. I've tried a few wireless stick vacuums at various prices over the years and it beats them all! If you or a family member suffer from allergies, you know the importance of keeping the house dust and dander free. And you also know that a simple Dustbuster just doesn't cut it. Consider BlackDecker Powerseries Pro Cordless Anti-Allergen Vacuum. With a high-performance filter, this 2-in-1 vacuum is optimized to capture 99.99 percent of allergens such as pet dander and dust particles. The filter is washable and reusable, and you can purchase replacement filters to improve vacuum performance (its FILTERSENSE technology notifies you when it's time to replace the filter). But it's more than an effective filter. Its 60 Minutes Time time (with a canister at low speed) means you can tackle more messes in the house, and its rotary steering design makes it easy to maneuver in Space. It features other intelligent features, including AUTOSENSE technology, which automatically regulates suction from bare floor to thick carpet to optimize opening hours, and LED light that illuminates cleaning surfaces and ensures that you bust dust more thoroughly. Reviewer Amazon Mack writes: It works great at capturing the dust and fur of pets from our hardwood floors! As an allergy sufferer, it is very important to me. Not as heavy and loud as our lightweight electric vacuum and easy to clean. I've had this product for a while and it still works really well. I use it every day! Midnight122, another Amazon customer, says: BlackDecker's Powerser Pro Cordless Lithium 2in1 Stick Vacuum is a big little machine to have around the house. Being wireless but able to clean messes with a decent amount of energy really makes it convenient... You can adjust the power level (which also reduces battery life), which is nice. Sometimes you're cleaning up a small mess that doesn't require a lot of energy. But in other cases, you need extra suction, such as the hair of pets. I find myself using it more on higher power settings and more to clean the spot than full cleaning sessions. It's also great for stairs though, again, I use it on the highest power setting. It's beautiful and easy and easy to work with... There are many attachments to cover almost any job that you have. The container is of good size and will hold a decent amount before emptying. I often find myself using a removable canister. I just love the ease of using without cords. I love it when this little guy is around the house! Need a wireless vacuum that keeps going and going and going? Shark ION F80 for you. It is powered by two, removable, rechargeable lithium-ion batteries that provide up to a total of 80 minutes (yes, you read that right) time to work- just switch the battery and keep cleaning. This is not the only impressive thing about the ION F80 shark. Its flexible coverage technology gives you the ability to bend a wand to easily clean hard-to-reach areas like under furniture, while its duo has pure technology that has two rolls of brush, fine dust gear and large debris on both carpets and hard floors. Pressing a button turns this workhorse into a portable vacuum so you can get vacuumed over the floor and into hard-to-reach places or your car. It's not magic, but it definitely feels like it. And if you don't have much space, the shark has your back. You can easily fold the vacuum for compact storage. Amazon reviewer S. Trasny writes: This is the most versatile vacuum we've ever owned, and it's as powerful as any I've ever used. This DuoClean technology is made for our home its combination of hardwood, laminate, tiles and carpets. Changing the operation to move from one type of sex to another is a simple click. Suction is powerful, regardless of the scenario. Adding to the versatility is the shark's ability to fold (again, at the touch of a button) his low profile. Using it as a stand, it will glide flexibly under most of our furniture. It is converted from a standup, losing the powerhead and its rollers, to use as a portable vacuum. Included are sticks and brush accessories so I can clean up close or in the far corners. This is the first battery running full size vacuum I've ever used and I have to say I'm very impressed. Power and length of time were my only problems, but the shark provides both in more than sufficient quantities. Overall, I can say that I am happier with shark performance and ease than I was with any other vacuum and I owned more than a few. Recommended. Recommended. Hoover linx platinum cordless stick vacuum cleaner
